EDUCATION

B.Tech, Computer Science Engineering

Vellore Institute Of Technology (8.32 CGPA)

May 2026

Sehore, MP

Class XII, BSEB (82%)

Prabhat Tara Girls Sr. Sec School

July 2019 – May 2021

Muzaffarpur, Bihar

Class X, CBSE (89%)

Sanskriti Public School

May 2019

Motihari, Bihar

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS

Data Analysis: Jupyter Notebooks, Excel, Power BI

Libraries: Pandas, NumPy, Matplotlib, scikit-learn

AI/ML: Prompt Engineering, LLM Integration, Ollama, Claude/Copilot CLI

Developer Tools: Git/GitHub, VS Code, AWS

PROJECTS

Healthcare Analytics Dashboard ([GitHub](#))

Python, Matplotlib, Jupyter

- Analyzed **10,000+** patient records to identify admission trends, department load, and treatment patterns.
- Performed data cleaning handling **missing values and outliers** using Pandas preprocessing pipelines.
- Built correlation analysis between **patient demographics, diagnosis, and length of stay** using Seaborn heatmaps.
- Created interactive visualizations for **bed occupancy rates and peak admission hours** using Matplotlib.

NeonTax — Modern Income Tax Calculator ([Live](#))

Python, Pandas, NumPy, Matplotlib

- Built a Python-based application for Indian income tax calculations (FY 2024-25 & 2025-26) with a web interface.
- Engineered logic supporting **old and new regimes** with slab-wise calculations using Pandas for data manipulation.
- Integrated interactive tax slab visualization using **Matplotlib** generating dynamic charts.
- Processed tax data efficiently using **NumPy** for numerical computations and array operations.

Personal Finance Tracker ([GitHub](#))

Python, MySQL, Matplotlib

- Created a **web application** for managing daily expenses, budgets, and income tracking using Python.
- Designed database schema with **MySQL** to store and query transaction records efficiently.
- Implemented user authentication and session management using Python with secure password hashing.
- Crafted interactive dashboards using **Matplotlib** to visualize spending trends and category-wise analysis.

Web Development Projects

HTML, CSS, JavaScript, React

- Designed and deployed a professional web presence for LNJ Corp Sol. (lnjoshics.co.in)
- Built a Nutritional Therapy web application for personalized diet recommendations and health tracking. (shreyanutricare.live)

COURSES & CERTIFICATIONS

Data Science Tools - Gained proficiency various data science and data visualization tools hosted on IBM Network Labs. (Issued by IBM)

Marketing Analytics - Mastered analytical frameworks for data-driven marketing and consumer segmentation. (NPTEL)

Cloud Computing - Acquired expertise in cloud architecture, virtualization, and scalable deployment models. (NPTEL)

Data Structures & Algorithms - Strengthened algorithmic problem-solving and Data Structures knowledge. (FACE

LANGUAGES KNOWN

English, Hindi
